

EXAMPLE 6 Solve a real-world problem

MICROPHONE SALES For the period 1988–2002, the amount of sales y (in millions of dollars) of microphones in the United States can be modeled by the function $y = 93\sqrt{x} + 2.2$ where x is the number of years since 1988. Graph the function on a graphing calculator. In what year were microphone sales about \$325 million?

Solution

The graph of the function is shown.

Using the *trace* feature, you can see that $y \approx 325$ when $x = 10$. So, microphone sales were about \$325 million 10 years after 1988, or in 1998.

ANOTHER WAY

You can graph $y = 93\sqrt{x} + 2.2$ and $y = 325$. The x -coordinate of the point where the graphs intersect represents the year in which sales were about \$325 million.

GUIDED PRACTICE for Example 6

7. **MICROPHONE SALES** Use the function in Example 6 to find the year in which microphone sales were about \$250 million.

HOMEWORK KEY

= **WORKED-OUT SOLUTIONS**
on p. WS1 for Exs. 7, 23, and 45

= **TAKS PRACTICE AND REASONING**
Exs. 15, 29, 39, 41, 48, 50, and 51

SKILL PRACTICE

- VOCABULARY** Copy and complete: A function containing a radical expression with the independent variable in the radicand is called a(n) ?
- WRITING** Is the graph of $y = 1.25\sqrt{x}$ a vertical stretch or a vertical shrink of the graph of $y = \sqrt{x}$? *Explain* your answer.

GRAPHING FUNCTIONS Graph the function and identify its domain and range. Compare the graph with the graph of $y = \sqrt{x}$.

- | | | | |
|------------------------------|------------------------------|--------------------------------|--------------------------------|
| 3. $y = 4\sqrt{x}$ | 4. $y = 5\sqrt{x}$ | 5. $y = 0.5\sqrt{x}$ | 6. $y = 0.25\sqrt{x}$ |
| 7. $y = \frac{3}{2}\sqrt{x}$ | 8. $y = \frac{1}{3}\sqrt{x}$ | 9. $y = -3\sqrt{x}$ | 10. $y = -6\sqrt{x}$ |
| 11. $y = -0.8\sqrt{x}$ | 12. $y = -0.75\sqrt{x}$ | 13. $y = -\frac{1}{4}\sqrt{x}$ | 14. $y = -\frac{5}{2}\sqrt{x}$ |

15. **TAKS REASONING** The graph of which function is a vertical shrink of the graph of $y = \sqrt{x}$?

- (A) $y = -5\sqrt{x}$ (B) $y = -\sqrt{x}$ (C) $y = \frac{1}{2}\sqrt{x}$ (D) $y = 8\sqrt{x}$

16. **WRITING** The range of the function $y = a\sqrt{x}$ is $y \leq 0$. What can you conclude about the value of a ? How do you know?
